November-70	5.8	65.6	59.8	73.1	99.1
December-70	5.3	64.1	58.8	71.5	98.0

- Beef Price data is from 1970 - 2015
- Timeseries data, .XLS format
- Displays farm, wholesale and retail value in cents per pound
- Grain production data from 1975-2015
- Searchable database
- Production in millions of metric tons

# Are chick flicks really just for girls?

Determining gender preference of romance movies based on ratings data collected by University of Minnesota GroupLens project.

H0: There is no relationship between gender and romance movie ratings.

H1: Average ratings for romance movies will be higher in the female gender group than male.

Over 1,000,000 anonymous ratings from 1-5, by 6,040 MovieLens users in 2000. Each user rated at least 20 movies.

- GroupLens project drives the MovieLens recommendation system
- Three data sets: ratings, users, & movies, all .dat files
- Ratings.dat contains user id, movie id, and rating (1-5)
- Users.dat contains user id, gender, age, occupation
- Movies.dat contains movie id, title, and genres
- Movie data entered by hand, so possible errors in the data set
